

JUAN CARLOS LÓPEZ CALVET

TECHNOLOGY & BUSINESS TRANSFORMATION EXECUTIVE

Oslo, Norway | +47 408 46 162 | jc@lopezcalvet.com
linkedin.com/in/jlcalvet

Technology executive, former CTO and general manager with 25+ years building and reshaping businesses across media, telecommunications, e-commerce, mobility and energy. Combines commercial growth and operating responsibility with deep engineering, enterprise platform and Data & AI expertise. Experience spans corporate separation, platform modernisation, acquisition integration and new-business creation in Europe and Australia. Leads through senior specialists and business leaders, translating technology investment into growth, efficiency and resilient operations.

SELECTED BUSINESS IMPACT

- **Transformation and efficiency.** Led Data & AI separation work at Schibsted; the Pulse separation completed without incidents, followed by re-architecture that reduced platform costs by nearly 40%.
- **New-business growth.** Established RACV Solar and reached profitability within two years; grew Home Security revenue by approximately 20%. Previously established Telstra Energy with a board-approved entry strategy.
- **Commercial AI.** Established Schibsted's strategic OpenAI publisher partnership, creating recurring licensing revenue; advanced AI products from experimentation towards adoption across news brands.

PROFESSIONAL EXPERIENCE

SCHIBSTED MEDIA

Director of Data & AI | 2024–present

Previously Director of Data, Schibsted News Media | 2022–2024

Oslo | Multi-brand Nordic media group; reporting to the CTO

Built and lead the shared Data & AI function supporting editorial, product, subscription, advertising and corporate teams. Own its infrastructure, strategy and operating model, leading senior domain heads across architecture, data platforms, AI foundations, product engineering, innovation and enablement, with wider leadership through cross-brand matrix responsibilities.

- **Corporate separation.** Led the Data & AI work required to establish independent media capabilities following the split from Marketplaces, including platform handovers, architecture, operating responsibilities and service continuity.
- **Platforms at scale.** Accountable for infrastructure processing hundreds of millions of behavioural events daily. Align reliability, cost and standardisation with analytics, personalisation and the data foundations for dynamic paywalls.
- **Acquisition integration.** Lead shared Data & AI integration priorities with TVM following Schibsted's SEK 6.55bn acquisition of TV4 and MTV, spanning architecture, platform reuse and enterprise AI tools.
- **Enterprise AI transformation.** Lead portfolio priorities, vendor contracts, cost control and governance. Negotiated Anthropic enterprise arrangements and led the launch of Claude across Schibsted with phased security controls. Own the programme to make data and content reusable for AI.
- **Innovation into operations.** Established the AI Lab and led the evolution of Videofy from experiment to a newsroom product, now transitioning to Product ownership for continued development and rollout.

PROFESSIONAL EXPERIENCE · CONTINUED

SCHIBSTED E-COMMERCE & DISTRIBUTION | Oslo, Norway

Chief Technology Officer | 2020–2022

Owned technology strategy for Norway's largest distribution network as it expanded from print logistics into e-commerce and last-mile services.

- **Business model transformation.** Aligned technology, operational assets and commercial opportunities to support the move into e-commerce, bringing an outside-in view of merchant and consumer needs.
- **Enterprise technology ownership.** Directed platform modernisation, reliability, security, cost efficiency and vendor orchestration in an operationally critical environment.
- **Growth execution and governance.** Led the initial cross-functional e-commerce growth programme, including business-model assessment, partnerships and proof-of-concept architecture. Served on the boards of Distribution Innovation and Morgenlevering.

FERDIA | Oslo, Norway

Chief Technology Officer | 2019–2020

- Built the technology platform and engineering capability for a mobility-as-a-service venture, translating a new bus-mobility proposition into an operating digital product.

KAHOOT! | Oslo, Norway

Privacy Compliance Officer | 2019

- Supported the transition from startup to international enterprise through privacy compliance and practices that enabled responsible growth.

RACV | Melbourne, Australia

General Manager, Smart Living | 2016–2018

Led new-business growth across solar, energy services, home security and connected-home products, combining strategy, technology, product and commercial delivery.

- **Profitable business creation.** Identified the solar opportunity, established RACV Solar and built it into a profitable business within two years.
- **Portfolio growth.** Increased Home Security revenue by approximately 20% and developed growth strategies across solar, smart homes, home care and wellbeing, and home trades.
- **Market execution.** Launched Samsung SmartThings in Australia, RACV Energy Compare and the Tiny Home advocacy programme through customer insight and ecosystem partnerships.

TELSTRA | Melbourne, Australia

General Manager, Technology & Strategy | 2015–2016

Previously General Manager, Innovation & New Growth Business | 2012–2015

- **New-market entry.** Established Telstra Energy and developed its board-approved strategy, using existing telecommunications assets to enter renewable energy generation, storage and services.
- **Investment and operating design.** Developed the market opportunity, business models, technology architecture and partner ecosystem; led trials spanning solar PV, lithium storage and control systems.
- **Repeatable innovation.** Conceived and launched the Telstra Innovation Centre, subsequently Telstra Labs, and developed the Hybrid/Backup Modem concept launched as Telstra Frontier.

EARLIER TECHNOLOGY & VENTURE LEADERSHIP

TELENOR OBJECTS | Oslo, Norway

Vice President, Technology & Products | 2009–2012

- **Platform and product leadership.** Designed and delivered Shepherd, an IoT platform connecting devices with applications through reusable APIs, enabling services across home security and eHealth.
- **End-to-end operations.** Established the operating backbone for eHealth services in Norway, spanning procurement, distribution, installation, monitoring, customer support and maintenance.

TELENOR IRIS | Oslo, Norway

Chief Technology Officer | 2006–2009

- Led the design and delivery of an RFID platform for tracking containers and fresh goods across supply chains. Combined technology development with commercial delivery for customers including Gilde, Bama, Veolia and Container Centralen.
- Received Telenor New Business Seed awards in two consecutive years for supply-chain RFID and location-based service propositions.

TELENOR R&D | Oslo, Norway

Research Manager; previously Researcher | 2000–2006

- Progressed from applied research to leading a team of 12 researchers in wireless technology, security and mobility. Built research and proof-of-concept partnerships with Nokia, Samsung, IBM and NXP.
- Developed early NFC/RFID mobile-payment concepts and intellectual property across mobile services, connectivity and commerce.

Additional advisory experience: Senior Advisor, Planet Innovation, Melbourne (2016), assessing energy-harvesting sensors for commercial and industrial property management.

BOARD, ADVISORY & INDUSTRY LEADERSHIP

- **Corporate boards.** Independent Board Member, Arbor. Previous board roles at Distribution Innovation and Morgenlevering, alongside the Schibsted E-commerce & Distribution CTO mandate.
- **AI and research governance.** Executive Board Member, NorwAI (NTNU); Steering Board Member, MediaFutures; Board of Advisors, WAN-IFRA AI in News Publishing.
- **Industry influence.** Represent Schibsted in international AI and media forums and contribute the technology perspective to public-policy work on AI access, content rights and responsible use. Speaker at WAN-IFRA, INMA and industry leadership events.

EDUCATION & CREDENTIALS

MEng, Telematics Engineering | Instituto Tecnológico Autónomo de México (ITAM)

Dissertation: elliptic-curve cryptography for information security.

Executive coursework: The Language and Tools of Financial Analysis; Fundamentals of Quantitative Modeling; Disruptive Strategy.

Recognition: Telenor Global Accelerate Program. Named inventor on patent publications spanning mobile ticketing, SIM/RFID and service discovery.

Languages: English, Spanish and Norwegian.
